NASH JAVELONA

AI AUTOMATION | TECHNICAL VIRTUAL ASSISTANT | PYTHON & N8N

Philippines | citepointsearch@gmail.com | 0936 928 6400

PROFESSIONAL SUMMARY

Entry-level AI Automation and Technical Virtual Assistant candidate with hands-on experience developing AI-assisted applications and automation workflows using Python, JavaScript, Flask, n8n, webhooks, and REST APIs. Built projects involving customer messaging automation, AI integrations, task scheduling, and content operations. Seeking a full-time remote role focused on workflow implementation, API integration, troubleshooting, and business process automation.

TECHNICAL SKILLS

Automation & integration: n8n, REST APIs, webhooks, HTTP requests, task scheduling, Gemini API, Meta Graph API

Development & data: Python, JavaScript, Flask, HTML/CSS, SQLite, JSON, basic application debugging

AI & operations: Ollama local models, AI-assisted development, prompt design, workflow dashboards, message processing

SELECTED TECHNICAL PROJECTS

ROSE AI - Facebook Messenger Workflow | n8n, JavaScript, Gemini API, Meta Graph API

- Designed an n8n workflow with incoming webhook handling, JavaScript processing, message buffering, wait/debounce logic, AI request configuration, and messaging API integration.
- Created business-specific response instructions covering uncertain pricing, product-image flags, order inquiries, complaints, and human-review wording.

TimeLens World - Social Content Operations | Python, Flask, APIs

- Developed a Python-based content operations system with a queue, scheduler, publishing-oriented integrations, runtime controls, and a responsive monitoring dashboard.
- Structured operational screens for publishing activity, integrations, analytics, and system status.

JARVIS Local v3 - Personal AI Assistant | Python, Flask, SQLite, Ollama

- Built a local AI-assisted productivity tool with persistent context, natural-language task routing, schedule prioritization, voice support, and local-model integration.
- Included Python self-tests covering scheduling behavior, persistence, intent routing, and fallback behavior.

EDUCATION

Information Technology - Undergraduate Coursework
